@ pasquale.panuccio@gmail.com

Senior Software Engineer specialized in data platforms, with hands-on experience in agentic AI — turning complex, regulated business requirements into scalable, high-quality systems. 15+ years delivering software end to end, from on-premises systems to serverless architectures, for banking, payments, telco and the public sector. Proven technical leader and mentor on international projects, trusted directly by business stakeholders; strong advocate of software craftsmanship practices (TDD, DDD, clean architecture).

Skills

Languages	**Java**, **Python**, TypeScript, JavaScript, Apex
Frameworks	**Spring**, FastAPI, Apache Spark, Angular, React, Apache Pulsar
Databases	**Oracle DB**, MySQL, PostgreSQL, MongoDB, DynamoDB
Development Tools	**IntelliJ IDEA**, **Visual Studio Code**, **GIT**, **Maven**, **Docker**, Gradle, UV, Eclipse, SVN
Cloud	**AWS**, **Azure**, **Serverless**
Deployment Tools	**CloudFormation**, Terraform, Ansible, Kubernetes
Software Development Practices	**TDD**, **XP**, **SOLID**, **Hexagonal Architecture**, **DDD**, **Clean Architecture**, **Microservices**
AI	**GitHub Copilot**, Claude Code, LangGraph
Leadership & Soft Skills	**Stakeholder management**, **Technical leadership**, **Customer-facing consulting**, **Mentoring**

Work Experience

Present
September 2022

Senior Software Engineer, UBS Group AG - former Credit Suisse AG, Lugano area - CH

Senior Software Engineer designing and developing bank-wide data platforms and AI-driven solutions, delivering high-quality software at scale.

Main projects:

- **Data Fabric Management** - Design and development of new functionalities for a data fabric management system to manage the entire life cycle of relevant credit risk data bankwide. The system is based on a microservices architecture and is deployed on OpenShift. The main goal of the system is to harmonize data coming from different sources and make it available to downstream systems mainly via API. Few numbers:
  - 20+ TB of data managed
  - ∼40 stakeholders
  - 60+ source incoming feeds
  - 40+ outbound feeds with around 10 GB of data per day

  Main technologies: **Java**, **Spring Boot**, **Oracle DB**, **OpenShift**, **S3**, **Apache Pulsar**
- **Confidential Data Management** - Technical reference of a component responsible to manage strictly confidential data. I have started a modernization of that component to increase efficiency, performance and maintainability. Main achievements include:
  - move from Oracle JDK8 to OpenJDK17
  - move away from Ant to Maven
  - from zero to 200+ unit tests
  - job's execution time reduced from 20 hours down to 3 hours
  - integration tests running during the CI pipeline using a disposable Oracle DB container
  - established a well structured documentation from scratch to help new developers to get up to speed with the component

  Main technologies: **Java**, **Maven**, **Oracle DB**
- **Credit Risk review Agentic Processing** - Joint collaboration between UBS and Microsoft to automate the Credit Risk review process using AI agents. Created a workflow that automates manual and time consuming tasks, like reading and analyzing balance sheet documents of hundreds of pages each, and populating Excel files with relevant information. The agents can also summarize the data and provide hints, raising alerts when such data doesn't meet the bank's policies. The workflow saves hours of manual work per document reviewed.

  Main technologies: **Python**, **UV**, **LangGraph**

August 2022
July 2018

Agile Software Engineer, Claranet Switzerland - former XPeppers SAGL, Lugano - CH

Delivered systems for banking, media and public-sector clients as hands-on engineer and, for the Senate, technical account manager.

Main projects:

- Senato della Repubblica Italiana - Technical Account Manager, helping the customer meet their needs by introducing Cloud technologies.
  Main technologies: Serverless, AWS Lambda, AWS API Gateway, AWS S3, ReactJS, JavaScript, DynamoDB
- lastminute.com - Design and development of new functions in the payment management systems of the entire LastMinute group. I worked following Agile methodology (SCRUM), doing TDD and pair programming. CI/CD with GitLab and Jenkins/Spinnaker.
  Main technologies: Java, Kotlin, Spring Boot, REST API, Grafana, MongoDB, MySQL, GitLab, Jenkins
- RSI - RADIOTELEVISIONE SVIZZERA ITALIANA - Design and development of a new workflow based on AWS, which consists of transcoding live streams into several formats to make them available on the customer web portal within minutes of the end of the live stream.
  Case Study Reference: aws.amazon.com — RSI Case Study
  Main technologies: Python, AWS Lambda, AWS DynamoDB, AWS API Gateway, AWS MediaConvert
- NEXI Spa - Design and development of an integration layer between the new product adopted by the company (Salesforce) and their legacy systems. We deployed an architecture made up of different microservices that interact with each other based on an event messaging layer. I worked as part of the development team adopting techniques like TDD, XP, DDD, Hexagonal Architecture and trying to implement a clean architecture.
  Main technologies: Kotlin, Spring Cloud, REST API, MySQL, RabbitMQ, Docker

July 2018
March 2017

Senior Technical Consultant, FINCONSGROUP AG, Lugano -CH

Design and implementation of applications in the context of innovative international research projects oriented to the Media sector. I was responsible for the technical management of the projects and I led the development process of the applications.

Main projects:

- CONTENT4ALL - As part of the CONTENT4ALL research project, with the aim of creating a system for the automatic translation of sign language using a photorealistic 3D Avatar, I worked on the definition of the whole architecture and a plan of integration between the different components. In this project I played the role of the Work Package leader on component integration.
  Main technologies: Java, Spring, REST API, Monitoring, Multimedia encoding/decoding
- PRODUCER - Design and implementation of a Web Application and extension of a Digital Asset Management (DAM) within the PRODUCER project, having as its objective the creation of a framework that facilitates and optimizes the creation of interactive television documentaries. In this project I played the role of Development Team Leader.
  Main technologies: Java, Play Framework, REST, Angular 4, MongoDB, NuxeoDAM, OAuth

February 2017
September 2014

Software Engineer | Salesforce Consultant, ARLANIS - REPLY Spa, Milano - IT

Design and development of business-oriented applications in the Salesforce environment for Telco and Media customers, plus custom Java web applications and integration layers (Play Framework, ETL with Talend).

Main projects:

- Fastweb Digital Transformation - REST services on the Salesforce platform integrating the Fastweb website during the Order Taking phase, with the CPQ Bit2Win product. Role: Technical Coordinator.
  Main technologies: Apex, REST, OAuth
- Vodafone Family and Convergence - Integration layer between Salesforce and Vodafone provisioning systems, orchestrating validation and transmission. Role: Development Team Leader. *Main technologies:* Java, Play Framework, SOAP
- RCS Salesforce Service Console - Introduction of the Service Console in the RCS Contact Center with integration to the existing telephone bar. Role: Analyst and development leader. *Main technologies:* Apex, Salesforce Service Console, Streaming API
- Vodafone Eagle Catalogue - Web application, built from scratch on Play Framework and hosted on AWS, to manage the catalog of Vodafone customer offers. Role: Development Team Leader. *Main technologies:* Java, Play Framework, Hibernate

August 2014
November 2011

Technology Consultant, HEWLETT PACKARD ITALIANA, Milano - IT

Design and implementation of innovative Cloud Computing projects and POCs with customers, European research centers and universities, as part of EU co-financed projects (cloud brokering, SLA negotiation, cloud energy efficiency, NFV).

Main projects:

- **Reskill Portal - Intesa San Paolo SpA** - Web application used by the customer's Contact Unit to assess the skills of the various operators. Role: Development Team Leader. *Main technologies:* **Java**, **Spring MVC**, **Hibernate**, **REST**, **Vaadin**
- **CONTRAIL** - SLA manager covering the whole SLA life cycle (proposal, counter offer, negotiation, agreement) within an international project building a cloud brokering platform. *Main technologies:* **Java EE**, **Spring**, **REST**, **SOAP**, **RabbitMQ**
- **NaaS Project** - Integration of a server-side web application with HP Operation Orchestration to add "Network as a Service" capabilities (SDN). *Main technologies:* **Java EE**, **Spring**, **REST**, **SOAP**

Languages

Italian ●●●●●

English ●●●●○

Strengths

- Reliable team player, stays effective under pressure
- Clear communicator with non-technical stakeholders
- Quick to master new technologies and business domains

Education

2011 COMPUTER ENGINEERING MASTER DEGREE at University of Calabria | Grade: 110/110
2008 COMPUTER ENGINEERING BACHELOR DEGREE at University of Calabria | Grade: 100/110
2004 Scientific high school DIPLOMA | Grade: 100/100

Certifications

Azure Fundamentals 2024

AWS Certified Solutions Architect – Associate 2021

AWS Certified Cloud Practitioner 2021

In compliance with the GDPR and the Italian Legislative Decree no. 196 dated 30/06/2003, I hereby authorize you to use and process my personal details
